

Agenda

Short-term exchange of groups of pupils C1

Cluj-Napoca, 25 January – 1 February 2015

Aims:

- the groups of students will have the opportunity to work together in the FR-RO teams, face-to-face, on their math research topics;
- the students will improve their language skills (FR - for the RO students, EN and RO - for the French students);
- the students will experience a different educational system;
- the students will discover a different culture;
- the students will enrich their knowledge about math, sciences and research;

During the short-term exchange, the students will develop their:

- language competences (FR - for the RO students, EN - for the French students);
- social skills;
- collaborative problem solving skills;
- metacognitive skills;
- ICT skills;
- international competencies (openness, flexibility, listening orientation, transparency – exposing intentions, cultural knowledge).
